

CONTENTS OF VOLUME IV

Special Dental Pathology

THE INVESTING TISSUES OF THE TEETH ; THE DENTAL PULP, THE PERIAPICAL TISSUES ; DISEASES OF THE SOFT TISSUES OF THE MOUTH
FOCAL INFECTION

	PAGE
DR. G. V. BLACK ON CHEYENNE MOUNTAIN.....	Frontispiece
SPECIAL DENTAL PATHOLOGY, INTRODUCTION	vii
Investing Tissues of the Teeth	
PHYSICAL FUNCTIONS AND PHYSIOLOGICAL RELATIONS.....	1
The Gums and Gingivæ.....	3
The Fibrous Mat, Epithelium, Blood Vessels, Lymphatics, Sensation, Healing Powers	
The Gingivæ	7
Development, Gingival Crevice, Septal Gingivæ, Epithelium, Functions, A Protective Tissue, Maintains Teeth in the Line of the Arch	
The Cementum	20
Function, Specialized Tissue, Differences between Cementum and Bone, Can not Repair Injuries, Subject to Resorption, Attachment of Principal Fibers of Peridental Membrane, Continuous Growing, Hypercementosis, Cementum in Animals	
The Peridental Membrane.....	29
Principal Fibers, Functions; Gingival Group, Trans-Septal Group, Alveolar Crest Group, Horizontal Group, Oblique Group, Apical Group, Resistance against Rotation, Strength of the Principal Fibers	
Indefinite Connective Tissue, Blood Vessels, Nerves, Lymphatics, Osteoblasts, Cementoblasts, Epithelium	
The Alveolar Process.....	44
Development; when Teeth are Malposed, when Teeth are Extracted, Results of a Break in the Peridental Membrane, Movement of Teeth Subsequent to Extractions, Physiological Movements of the Teeth, Drifting of the Teeth	

	PAGE
HISTORY OF DISEASES AND TREATMENT OF INVESTING TISSUES	51
Prior to 1821.....	51
In Prehistoric Times, In the Ancient World, In the Middle Ages, In the Eighteenth Century	
1821 to 1867.....	52
Koecker and Hayden, Clinical observations and Problems, Study of Calculus	
1867 to 1885.....	54
The Era of Riggs	
1885 to 1899.....	55
Introduction of the Term Pyorrhea Alveolaris; Serumal Calculus, Micro-organisms, Relation of Gout to Pericementitis, Treatment	
1899 to Date.....	59
Histological and Pathological Studies of Peridental Structures, Injuries, Pericementitis Resulting from Occlusal Stress, Micro-organisms, Effect of Systemic Conditions, Treatment, Vaccines, Mechanical Procedures, Gum Resection, Systemic Treatment, Results of Treatment	
GINGIVITIS AND PERICEMENTITIS DUE TO DEPOSITS OF SALIVARY CALCULUS.....	68
Composition of Salivary Calculus, Studies of Deposits, G. V. Black's Investigations.....	71
Nomenclature, Nidus Necessary for Beginning Deposit, Microscopic Appearance, Paroxysmal Character, Saliva Collected from Stenson's Duct, Quantity of Food Digested re the Deposit, Prevention of Deposits on the Teeth	
Diagnosis of Injuries to the Tissues.....	74
Suppuration, Pericementitis, Attachment of Peridental Membrane to Root Maintained to Level of Soft Tissue Remaining, Pain and Soreness	
Conditions Contributing to the Occurrence.....	80
Form Which Gives Opportunity, Variations in Position and Progress, Forms of Artificial Dentures to Avoid Deposits, Influence of Mastication in Preventing Deposits, Menace to General Health	
Treatment.....	85
Preventive Treatment: Treatment by the Dentist, Removal of Deposits, Care of Tissues, Care by the Patient, Subsequent Examinations, Fixation of Teeth that have been Loosened	
GINGIVITIS ASSOCIATED WITH DEPOSITS OF SERUMAL CALCULUS.....	94
Causes of Deposit, Conditions of Occurrence, Comparison of Serumal with Salivary Calculus	
Gingivitis Due to the Deposit, Compression of Deposits by the Gingivæ, Variations in Location of Deposits, Suppuration Involving Peridental Membrane	

	PAGE
Treatment	99
Removal of Deposits and Care by the Dentist, Care by the Patient, Subsequent Examinations	
GINGIVITIS CAUSED BY INJURIES	103
Frequency of Different Forms of Gingivitis, the Attitude of the Profession Toward Injuries to the Gingivae	
General Statement of Causes and Symptoms.....	106
Examinations, Diastema, Contacts and Proximal Con- tours, Inflammation, Suppuration, Complaint of Pain, Resorption of Septal Tissue, Deposits of Serumal Calculus, Detachment of Peridental Membrane	
Treatment; Classification of Conditions	112
Lack of Contact of Teeth.....	113
Separations Following Extractions, Abnormal Positions of Teeth, Excessive Occlusal Stress, Weak Contacts, Proximal Surface Decays, Restorations which Fail to Make Contact, Loss in Width of Neighboring Space	
Improper Contact of Teeth	121
Abnormal Forms of Teeth, Malpositions, Em- brasures Abnormally Narrow, Excessive Proximal Wear, Restorations and Crowns	
Danger of Disturbing the Occlusion	126
Deviations from Normal Smooth Contour of Tooth Surfaces	127
Sharp Edges of Cavities, Imperfect Margins of Restorations and Crowns	
Lack of Cleanliness.....	128
Lack of Natural Cleaning, Lack of Artificial Cleaning, Errors in Cleaning	
Gingivitis Due to Abuse of Tissues by the Dentist. . .	130
With Ligatures, With Finishing Instruments and Tapes, Failures to Remove Ligatures and Pieces of Rubber Dam	
Essentials in Successful Management of Gingivitis ...	131
Careful Study of Cases, Mouth Divided into Six Regions, an Exact Method of Separation Necessary	
PRESSURE PERICEMENTITIS	133
Studies of the Distribution of Force in Mastication	135
Just and Equitable Distribution of Force, the Moment of Force, Bicuspid and Molars, the Incisors	
Studies of the Tissue Reactions to Orthodontic Force	141
Oppenheim's and Stuteville's Investigations	

	PAGE
Etiology of Pressure Pericementitis.....	148
Lowered Resistance, Abnormal Wear, Diseases Affecting Individual Teeth, Major and Minor Malocclusion, Dental Operations, Abrasion	
Changes in Pericemental Tissues.....	150
Tipping Force Labially on Anterior Teeth, Tipping Force in Mesio-Distal Plane, Osteosclerosis, Summary of Tissue Changes	
Physiological Movements of the Teeth.....	158
Drifting of the Teeth	
Diagnosis of Pressure Pericementitis.....	160
Procedure in Examinations	
Treatment	162
Prevention; Reestablish Just and Equitable Distribution of Force, Correction of Malpositions, May Stabilize Loose Teeth	
CHRONIC SUPPURATIVE PERICEMENTITIS.....	165
Frequency	
Causes of Chronic Suppurative Pericementitis.....	167
Gingivitis Always Precedes, Serumal Calculus, Injuries to Gingivæ, Pressure Pericementitis, Systemic Conditions	
Progressive Involvement of the Several Tissues.....	169
Gingivitis, Lowered Resistance of Gingivæ, Infection Invades Deeper Tissues, Destruction of Peridental Membrane, Cementoblasts Destroyed, Resorption of Bone, The Pocket Tissue, Deposits of Serumal Calculus, Lateral Pericemental Abscess, Progress of Pockets, Movements of the Teeth, Labial Movement of Upper Incisors, Multiple Pocket Formation, Admixtures of Inflammations Caused by Deposits of Salivary Calculus	
Diagnosis of Chronic Suppurative Pericementitis.....	187
The Examination, Classification of Cases, Appearance of the Gingivæ, Condition of Contacts, Detachments of Peridental Membrane, Resorption of Bone, Presence of Pus, Deposits of Serumal Calculus, Movements of Teeth, Looseness of Teeth, Missing Teeth, Epithelial Lining of Pockets, Complaint of Pain, Enlargement of Cervical Glands, Excitation of Salivary Glands, Lateral Abscess, Differential Diagnosis from Acute Periapical Abscess, Illustrations of Several Stages of Gingivitis and Pericementitis	
Recording the Examination.....	194

	PAGE
Physiological Reactions of Supporting Structures.....	195
Epithelium	195
Recovery from Gingivitis, Crevice Epithelial Projections attached to Cementum, Proliferations to Protect Pocket Tissue, Character of Epithelium in Deep Pockets	
Peridental Membrane	197
Attachment to Cementum Maintained in Pressure Pericementitis, Destruction in Chronic Pericementitis; When Detached from Cementum	
Alveolar Process	197
Conditions of Bone Regeneration	
Cementum	198
Can not Initiate Process of Repair, Repair of Cementum Resorptions, Possibilities of Reunion of Tissue to Denuded Cementum	
Key to Treatment.....	199
Histo-Pathological Studies of Planted Teeth.....	200
Experiments on Dogs, Radiographs of a Case of Replantation in Human Mouth	
Treatment of Chronic Pericementitis.....	203
Prevention; Treatment Methods, Treatment Planning; Gum Resection or Extraction; Order of Procedure in Treatment; Extraction, Signs and Symptoms which Indicate Extraction; Gum Resection, Steps in Operation, Pockets in Incisor Region, in Bicuspid-Molar Region	
Studies of Histological Changes Subsequent to Gum Resection; Photographs of Cases	234
Splints for Loose Teeth.....	239
Removal of Deposits and Care by the Dentist.....	240
Gingivitis and Shallow Pockets.....	247
Reconstruction	247
DISEASES OF SOFT TISSUES OF THE MOUTH.....	248
Acute Ulcerous Gingivitis, Vincent's Angina, Hypertrophic Gingivitis, Aphthous Stomatitis, Decubital Ulcers, Herpes Simplex, Thrush, Leukoplakia, Mercurial, Bismuth and Lead Stomatitis, X-Ray Burns, Abnormal Superior Labial Frenum, Geographic Tongue, Black Tongue, Burning Tongue, Macroglossia, Macrocheilia, Perlèche Cheilitis, Cheilitis Exfoliativa, Mucous Cysts, Angioma, Papillomata, Epulis, Ranula	
BIBLIOGRAPHY OF DISEASES AND TREATMENT OF INVESTING TISSUES OF THE TEETH AND THE OTHER SOFT TISSUES OF THE MOUTH	265

The Dental Pulp; Periapical Tissues		PAGE
PHYSICAL FUNCTIONS AND PHYSIOLOGICAL RELATIONS.....		269
Cellular Elements, Odontoblasts, Dentinal Fibrils, Blood Vessels, Lymphatics, Nerves, Sensory Function, Healing Powers, Resorptions of Dentin		
HISTORY OF PULP DISEASE AND TREATMENT.....		277
Before 1800		277
Arabian Surgeons, Archigenes, Fauchard, Bourdet		
1800-1836		278
Bell, Koecker, Treatment Confined to Single-Rooted Teeth, Cotton Root Fillings, Results		
1836-1882		280
Introduction of Arsenic, Replantation, Pulp Amputa- tion, Root Canal Filling Materials		
1882-1910		281
The Germ Theory of Disease, Pulp Vitality Tests, The X-Ray, Studies of Effect of Arsenic on the Tis- sues, Introduction of Cocaine, Use of Chemicals in Root Canals, Strong Antiseptics, Methods of Preserving Part of the Pulp		
1910 to Date.....		285
Hunter on Oral Sepsis, The X-Ray, Studies of Chronic Mouth Foci, Reaction against Strong Antiseptics, Histological Studies, Improved Tech- nic		
DISEASES OF THE DENTAL PULP.....		288
Hyperemia		289
Etiology, Pathological Changes, Diagnosis, Sequellae		
Inflammation		293
Etiology, Pathological Changes, Acute Pulpitis, Pain, Chronic Pulpitis		
Hyperplasia of the Pulp		297
Diagnosis, Treatment		
Calcifications Within the Pulp Tissue.....		299
Calcifications Attached to Walls of Pulp Chamber		301
Calcifications Growing Free in the Pulp Tissue.....		308
TREATMENT OF THE DENTAL PULP.....		310
Conservation		310
Thorough and Frequent Examinations, Greater Care in Dental Operations, Use of Non-Conductors		
Treatment of Hyperemia		312
Capping Exposures of the Pulp, Time of Calcification of Roots of Permanent Teeth, Technic of Capping		
Technic of Pulp Treatment.....		315
General Considerations, Asepsis, Aseptic Technic, Rubber Dam, Sterilization of Field, Sterilization of Instruments, Dressings, etc., Instruments, Surgically Clean Hands, Sealing Treatments		

	PAGE
Rationale of Pulp and Root Canal Medication.....	320
Experiments with Medicaments Used in Treatment	
Treatment of Pulp of Temporary Teeth.....	324
Time of Complete Calcification and Beginning Resorption of Roots, Serious Results of Exposures of Pulp, Technic Same as for Permanent Teeth, Periapical Abscesses from Temporary Teeth	
Treatment of Vital Pulp.....	329
Exposure of the Pulp, Opening the Cavity, Rubber Dam, Exposure with Broad Instrument, Medication, Anesthesia, Arsenic Trioxide	
Opening Pulp Chamber.....	334
Occlusal Cavities in Molars, Proximal Cavities in Molars, Cavities in Bicuspids, Cavities in Incisors and Cuspids	
Removal of the Pulp.....	337
Location of Canals in Upper Molars, in Lower Molars, Variations in Forms of Pulp Chambers, Opening Pulp Chambers in Sound Teeth	
Treatment of Teeth Having Dead Pulp.....	346
Conditions Presenting, Asepsis, Instrumentation	
Treatment of Pulp Chambers Narrowed by Calcific Deposits.....	349
Removal of Previous Root Canal Fillings.....	351
Filling Root Canals.....	352
Preparation, Instruments, Size of Foramen and Length of Canal, Technic for Large Canals, for Small Canals, Horns of Pulp Chambers, Radiographic Studies of Root Canal Fillings	
CHRONIC PERIAPICAL INFECTIONS.....	361
Frequency; Abscess, Granuloma, Cyst	
Etiology, Pathological Changes, Involvement of Peridental Membrane and Bone about Apex, Chronicity caused by Contamination of Cementum	
Diagnosis.....	369
Dead Pulp, Traumatic Apical Pericementitis, Acute and Chronic Apical Pericementitis, Granuloma, Chronic Periapical Abscess, Variations in Positions of Sinus Openings, Deposits of Serumal Calculus, Bacteriology	
Treatment.....	377
Teeth that Should be Retained.....	377
Teeth that Should be Retreated.....	380
Teeth that Should be Extracted.....	383
Periapical Cyst, Diagnosis, Treatment.....	385
Chronic Osteitis, Symptoms, Treatment.....	387

	PAGE
ACUTE PERIAPICAL ABSCESS	389
Etiology, Pathological Changes, Apical Pericementitis and Pus Formation, Resorption of Bone, Pus Penetrates Bone, If Pus Penetrates Periosteum, If Pus Lifts Periosteum, Burrowing of Pus	
Distinctions between Periapical and Other Abscesses	392
Symptoms	393
Constitutional, Local, Pain and Swelling, Differential Diagnosis	
Treatment	395
Secure Good Drainage, Delay Extraction of Tooth, Irrigation, Open Pulp Chamber after Acute Symptoms have Subsided	
The More Severe Cases.....	398
Relief of Pain and General Symptoms	
NECROSIS OF THE JAWS	404
Etiology, Symptoms	
Treatment	407
Secure Good Drainage, Cleanliness, Extract Loose Teeth, Cathartics and Anodynes, Removal of Sequestra	
BIBLIOGRAPHY OF THE DISEASES AND TREATMENT OF THE DENTAL PULP AND PERIAPICAL TISSUES.....	411
FOCAL INFECTION	414
Evolution of the Focal Infection Principle.....	415
Pathologic Changes in Foci of Infection.....	419
Types of Bacteria	422
Location and Types of Primary Oral Foci.....	422
Incidence and Significance of Primary Oral Foci.....	424
Tabulation from 6000 X-Ray Films.....	425
Etiology of Iritis	426
The Pulpless Tooth Problem.....	428
Bacteriological Examination of Teeth Sterilized and Teeth not Sterilized after Extraction.....	431
The Pulpless Tooth; Concluding Statement.....	433
Histological Lesions in Rabbits	
Diagnosis of Focal Infection.....	435
Clinical Management of Oral Focal Infection; Indications for Extraction	436
Conclusion	437
BIBLIOGRAPHY ON FOCAL INFECTION.....	439
GLOSSARY OF TECHNICAL TERMS (for the Four Volumes).....	442
INDEX	459
